A worker stands in front of pipes stacked at the NordStream 2 facility on October 19, 2017, in Sassnitz, Germany. The German-Russian project, to construct a dual-line pipeline to transport natural gas from Russia to Germany and Western Europe has been a casualty of the war between Russia and Ukraine. Although completed in September 2022, the controversial pipeline has not been used and has been subject to suspected sabotage. (Photo by Carsten Koall/Getty Images)

Energy Geopolitics- Access to oil and gas has long held an influence over the politics of individual nations and their relations with others. But as more countries move toward sustainable energy, and supply chain shortages affect the availability of oil and gas, how will this change the way in which the United States interacts with the outside world? By Carolyn Kissane

War Crimes- Russia’s invasion of Ukraine has resulted in widespread charges of war crimes and calls for justice. But what exactly are war crimes? Opinions of what constitutes a war crime have evolved, as have ways to identify and punish the perpetrators. How will the war crimes committed in Ukraine be dealt with? By Francine Hirsch

China and the U.S.- For the past ten years, the United States and China have been locked in a competition for who has the greatest global influence. One major point of contention is the status of Taiwanese sovereignty, which has become even more relevant recently with the possibility that Russia’s invasion of Ukraine may prompt China to take similar action regarding Taiwan. How will the United States engage a China which is increasingly seeking to expand its sphere of influence? By David Lampton

Economic Warfare- Waging economic warfare consists of a variety of measures from implementing sanctions to fomenting labor strikes. Such tools are utilized by states to hinder their enemies, and in the case of the United States have been used as far back as the early 19th century. Since Russia invaded Ukraine in February 2022, economic warfare has been the main means for the west to challenge Russia. How effective will these sanctions be at convincing Russia to cease its war? By Jonathan Chanis
Politics in Latin America- Electoral results in Latin America over the past four years have led many observers of the regional/political scene to discern a left-wing surge in the hemisphere, reminiscent of the so-called “Pink Tide” that swept the area some 20 years ago. But how much do these politicians actually have in common? What implication does their ascendency have for the region? By Jorge Castañeda

Global Famine- Fears of global food shortages have followed Russia’s invasion of Ukraine, which has disrupted grain shipments from the major grain producer. But what about countries and regions that were suffering before this impending shortage? How is famine defined, and how is it different from simple food shortages? What if any remedies are there? By Daniel Maxwell

Iran at a Crossroads- By the fall of 2022, Iran was in a state of turmoil due to widespread protests against government-enforced wearing of the hijab, a failing economy, an ineffective new president, and the looming succession of the country’s leader, Ayatollah Khamenei. Abroad, renewal of the Iran nuclear deal seemed doubtful and tensions remain high between Iran, Israel, and Arab states. Many Iranians have lost hope of a better future, and the country seems at a crossroads. How should the United States deal with it? By Lawrence Potter

Climate Migration- As climate change accelerates and drought and rising sea levels become more common, millions of people in affected regions must uproot themselves and seek safety elsewhere. Who are these affected individuals, and how might the United States aid them, and be affected by the migration? By Karen Jacobsen

Several of our articles this year touch upon the ongoing war in Ukraine. For this reason, we are providing a map of Ukraine with its surrounding geography in order to give the reader a sense of some of the major developments since the war began in February 2022.

Russian forces invaded Ukraine on February 24, 2022, after Russian President Vladimir Putin announced a "special military operation" with the goal to "demilitarize" and "denazify" Ukraine and to protect Russians in Ukrainian territory. The invasion has been widely condemned internationally and has resulted in charges that Russians have committed war crimes. The war has affected energy shipments to Europe, which was a major customer for Russian oil and gas, and has led Europeans to attempt to cut back on the use of Russian energy, and led to the abandonment of the NordStream 2 gas pipeline. Another effect of the war is that shipments of grain from Ukraine and Russia have been slowed or halted, which in turn will increase food insecurity in many parts of the world. The United States and many other countries have imposed sanctions on Russia in an attempt to discourage the continued war in Ukraine. There is concern that China might be emboldened by Russia's attempt to annex Ukraine and move on Taiwan. The repercussions from the war in Ukraine are being felt all over the world.
